

Problemi di ottimizzazione della forma

Giuseppe Buttazzo (Università di Pisa)

1. A general presentation of shape optimization problems, with some classical issues.
2. The isoperimetric problem with some variants.
3. Optimal aerodynamical profiles.
4. Optimal interfaces between two media.
5. Optimal shape of a thin insulating layer.
6. Optimal domains for elliptic operators.
7. A nonexistence example and Relaxed Dirichlet problems.
8. Existence under geometrical constraints.
9. An existence result for spectral optimization problems.
10. Other existence results and open problems.
